Vortex Interactions in Type II Superconductors

Brian Martin

April 6, 2005

University of British Columbia
Physics 449: Honours Thesis

Abstract

Contents

1 Introduction

1.1 Superconductors

1.2 Path Integrals

1.3 Problem Statement

2 Theory

2.1 Path Integral Details

2.2 Solving Schrodiner Equation in One Dimension

2.2.1 Eigenvalue Problem

2.2.2 Initial Value Problem

2.3 Solving Schrodiner Equation in Three Dimensions

2.3.1 Gauss-Seidel Relaxation

2.3.2 Successive Over Relaxation

2.4 Independent Residual

3 Results

3.1 One Dimension

3.1.1 Eigen-problem

3.1.2 Initial Value Problem

3.2 Three Dimensions

4 Conclusion
